# About US

JST Industry is a professional manufacturer of CNC machining parts, plastic mold & injection molded products, castings & forgings, stamping parts & welding parts, which were applied to the field of medical device, aerospace & aviation, food equipment, auto parts, electronics, etc. Since its founding, our company has adhered to the principle of Innovation, Diversity and International.

JST Industry is located in Suzhou, China with an area of 38,800 square meters and fixed assets of over 5 million US dollars. Established in 2009, JST employs 120 employees including 25 experienced engineers. Based on our professional engineering team and advanced facilities, we can supply the total solution from the development & design of new products to manufacturing & assembling for diverse requirements. We have got certificate of ISO9001 in 2010. The annual output of our products is over 10 million US dollars, more than 80% were exported to America, Australia and European countries.

Our manufacturing facilities were imported from Japan, Germany and Switzerland, including 10 sets machining centers (3/4/5 axis), 50 sets CNC lathe, 15 sets 80-500 Ton plastic injection machines, 30 sets of punching machines, 5 sets welding machines (TIG welding & laser welding) and some assisting machines & testing equipments. Professional quality and efficient service are our best advantage, we are looking forward to co-operating with the customers from all over the world.

# Products

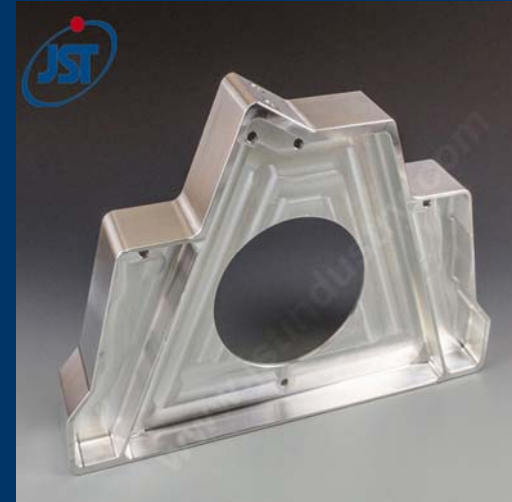

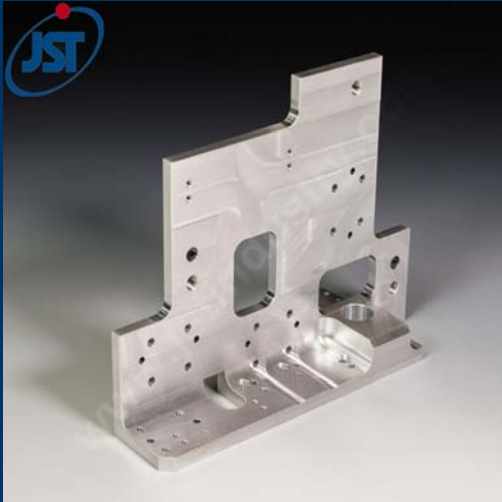

CNC Machining Parts

Plastic Injection Parts

Castings, Die-casings, Forgings

Stamping Parts & Welding Parts

# Manufacturing Capabilities

## 1.CNC Machining:

3-axis machining center(DMG): 6 Sets

4-axis machining center(DMG): 4 Sets

5-axis machining center(DMG): 2 Sets

CNC lathe(SMTCL): 20 Sets

General lathe(SMTCL): 2 Sets

Turning-Milling composite machine tool(DMG): 6 Sets

Longitudinal lathe(TSUGAMI): 6 Sets

Automatic lathe(TY): 30 Sets

CNC automatic lathe / CNC Swiss Lathe(TSUGAMI): 6 Sets

Other assist equipments include:

Milling machine, Drilling machine, Centerless Grinding machine, External Cylindrical Grinding machine, etc.

Inspection equipment:

Vernier Caliper, Micrometer, Height Gage, Hardness Tester, Two-dimensional image measuring instrument, TESA Micro-Hite 300, Mitutoyo surface Roughness Tester, Mitutoyo CMM and Ultrasonic Cleaner.

## 2. Plastic Injection:

100 tons plastic injection machine (Haitian):2 Sets

150 tons plastic injection machine (Haitian):2 Sets

200 tons plastic injection machine (Haitian):2 Sets

250 tons plastic injection machine (Haitian):2 Sets

350 tons plastic injection machine (Haitian):1 Sets

500 tons plastic injection machine (Haitian):1 Sets

250 tons dual-color plastic injection machine (Haitian):2 Sets

## 3. Casting, Die Casting, Forging

Based on our manufacturing facilities and the local co-operating factories, we could do the sand castings, investment castings (lost wax castings), aluminum alloy die-casting, zinc alloy die-castings and forgings. We could also do the additional machining for these parts, and also the finish treatment (heat treatment, sand blasting & anodizing, polishing, powder coating, etc..) as well.

## 4. Stamping & Welding

80 tons punching machine (Yangli): 2 Sets  
120 tons punching machine (Yangli): 4 Sets  
150 tons punching machine (Yangli): 2 Sets  
200 tons punching machine (Yangli): 2 Sets  
250 tons punching machine (Yangli): 4 Sets  
300 tons punching machine (Yangli): 2 Sets  
350 tons punching machine (Yangli): 1 Set  
500 tons punching machine (Yangli): 1 Set

Laser Welding

Laser Cutting

# Quality Assurance

JST Industry has established a strict quality control system according to ISO9001 standards from raw material purchasing to packing and warehousing. "Quality at JST Industry is everyone's goal. "Our future depends upon customer satisfaction." Toward that goal, all employees will strive to generate products with zero defects, meet on-time deliveries to our customers and work continually to improve all aspects of our company.

JST is equipped with a full set of advanced quality inspection equipments: Vernier Caliper, Micrometer, Height Gage, Hardness Tester, Two-dimensional image measuring instrument, TESA Micro-Hite 300, Mitutoyo surface Roughness Tester, Mitutoyo CMM and Ultrasonic Cleaner, Ultrasonic flaw detector, Pressure testing instrument.
